

**Aesthetic  
Ultrasound**  
Academy

 **Universitätsspital  
Basel**  
Margarethenklinik

**Save the date:** 27<sup>th</sup> August 2022

## **Basic principles of Ultrasound in Aesthetic Dermatology**

The use of **ultrasound in Aesthetic Dermatology** has become increasingly present in the daily lives of the most qualified practitioners, helping them to avoid and treat complications related to injectable procedures.

This intensive one day hands on course will:

- ✓ Familiarize you with the use of dermatological ultrasound
- ✓ Demonstrate how to identify anatomical structures
- ✓ Teach you the basic technique to perform ultrasound guided injections

During the course you will have the opportunity to handle different devices and will follow a **live ultrasound guided filler** treatment performed by our experts.

**5 SGD V Credit Points**

### **Coordinators**

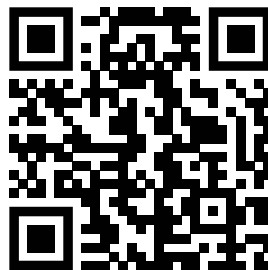

**Dr. Roberta  
Vasconcelos-Berg,  
MD, PhD**

Director of Aesthetic, Reparative and Laser Dermatology at Universitätsspital Basel.

**Dr. Rosa Sigrist, MD**

Radiologist, focused on dermatological and aesthetic ultrasound. University of Sao Paulo Medical School, Brazil.
